MONITOR COVERAGE & MEASURE IMPACT

As the media landscape continues to evolve, so too does the role of public relations. It is no longer enough for communicators to rely on the benchmarks and tactics that were used in a time before social media, all things digital, and better access to data.

Public relations and communications professionals need tools that will allow them to effectively roll with the times, evaluate the impact of their strategies, tailor their approach, and continuously improve their results.

Our intuitive media monitoring solution, Agility Monitoring, allows you to quickly and easily navigate the world of media content, gain the insights necessary to inform your campaigns, and prove the true worth of your PR efforts.

Navigate the world of media content, gain the insights necessary to inform your campaigns, and prove the true worth of your PR efforts.

INTUITIVE MEDIA MONITORING

Easy media monitoring lets you know exactly what’s being said about you, your industry, campaigns, and your competitors across a variety of channels.

FAR AND WIDE LISTENING
Monitor topics wherever you need, with a broad content coverage of online, print, broadcast, social media, and podcasts. We’ll ensure you track all vital content sources and stay up to date.

QUICK AND EASY SETUP
With intuitive, easy-to-set up monitoring and personalized client onboarding, you can focus on your monitoring results and waste no time getting set up.

NEVER MISS A STORY
Stay on top of coverage, including your brand, industry, and competitor news, with automated coverage email alerts that inform you (and whoever else would like to know) when there are mentions.
FIND COVERAGE THAT MATTERS

Cut through the noise with simple yet powerful search features that help you find the coverage that matters most.

VIRTUAL SEARCH ASSISTANT
Agility Monitoring allows you to conduct an advanced-level search on your topics without in-depth knowledge of Boolean logic. We use artificial intelligence technology to scan millions of articles in our database and provide suggestions for phrases or keywords that typically appear alongside your search terms. This helps tailor your search criteria and produce the most relevant results possible.

GET THE FULL PICTURE OF COVERAGE
Our revolutionary image monitoring capabilities will show you images that appear in online news coverage. And using powerful machine learning models that understand image content, you’ll be able to unearth otherwise hidden coverage, even when there is no mention in the article itself.

SLEEK AND SIMPLE SHARING
Get actionable insight into the topics important to you. Easily share monitoring results so you and your stakeholders are always in the know and have the insights needed to develop strategy and demonstrate the value of your efforts.

SHARE YOUR COVERAGE
Organize and share collections of coverage to keep your colleagues or stakeholder up to date by email or RSS feed. Curate your briefings manually, automatically add coverage... or do a little bit of both! We ensure collecting and sharing coverage is easy, efficient, and includes exactly what you want.

2-CLICK REPORTING
Take a deeper dive into your coverage with interactive executive reports that can be put together in as little as two clicks, or take a more tailored approach and create custom reports by selecting from an ever-growing library of charts. Quickly download individual charts in a variety of file types to use in presentations, export an in-depth campaign or a quarterly report to share with your stakeholders, or schedule recurring reports to email or RSS feed.
